

Hints & Tips when creating your artwork using our templates

Please prepare your artwork referring to the trim & bleed details below.

Our technical 'How to Guide' (page 2 of this PDF) will help you ensure the finer details of file preparation are met and your files are ready for print production.

-  **Bleed Area:** The bleed area extends 3mm outside of the final trim marks. The bleed is trimmed off at the print finishing stage.
-  **Trim Area:** This is the finished document size. Any content outside of this area will be trimmed off. These guides have been set to a Magenta Spot Colour within the template and renamed as trim or cutter guide.
-  **Crease / Fold Guide:** These guides have been set to a Magenta Spot Colour within the template and renamed as crease or fold guide and indicate the crease or fold position.
