Counter Mini

Graphic Dimensions

Cut size
1358 x 1015mm Visible
Area (Front View)
545 x 1015mm

System Components

Counter frame
Wooden top
Internal shelves
Wheeled case
Graphic protection tube

Unpack the kit from the bag and erect the frame, ensuring locking bars hold the frame together securely. Fit all 12 vertical magbars into place. Then fit the horizontal magbars. The top bar needs to be positioned into the centre holes on the hub whilst the bottom one needs to be in the top holes

Now attach your graphic. Starting from right to left align the magtape on the panel with the mag bars on the frame and follow it around. Now insert internal shelves and finally attach the counter top.
